

The Association of the Customs brokers of La Spezia asks the AdSP to clarify the development plans of the port of the city

Landolfi: necessary to have a picture of precise reference species on the choices, the deep ones, but still more on the times than start and completion of the work

infosMARE - The Association of the Customs brokers of La Spezia (A.spe.do) denunciation an increasing and worrisome lack of sure perspectives about the development of the port of from Liguria city. "By now from weeks, if they do not give months - the president of the association explains, Sergio Landolfi - the port it is ended under a shadow cone and is disappeared also from the area of attention of the average. Nevertheless less than a month it makes in occasion of road a show to New York of a mixed delegation of the Authority of Harbour System and of Contship, a plan of 328 million euros of investments is announced private compounds public, "that they will allow - is asserted - with the port of call to increase its surface of 25%""(*infosMARE* on 13 September 2018).

"It is own in the light of that announcement - Landolfi specifies - than as harbour operators we cannot today esimere asking own the Authority of Harbour System a transparency operation that allows us to have a picture of precise reference species on the choices, on the deep ones, but still more on the times than start and completion of the work".

A.spe.do remembers that, second how much illustrating to New York, the investments would be on and so subdivided: participations in new coming harbour infrastructures, 188 million euros from the private ones, 10 million from the public; participations in new railroads and railway infrastructures and new roads 10 million euros from private and the 75 from the public; reclamations and dredgings 45 million euros from the public.

"But in practical terms - the president of the association of the Customs brokers observes - on the docks and in the large squares where we work every day we do not have practical replies of the advance of these work. Correctly president Roncallo has us summoned on 23 October next also and especially in order to illustrate the plans of the port. We hope and we are convinced - Landolfi concludes - than that encounter can fix a full stop on which to program with the development of our port of call". (*infosMARE*)
