

MSC Cruises to roll out IB InfoSHIP Asset to all ships

• Thursday, 27 May 2021 | [Software, Big Data & IoT](#)

IB Srl has reached an agreement with MSC Cruises for the delivery and implementation of IB InfoSHIP Asset (Maintenance & Procurement) and Hotel Defect Management software products, to all existing and future vessels of MSC Cruises.

IB will deliver the solutions to a total of 17 existing vessels, and 10 new buildings. The contract includes the option to expand the delivery to other IB software products.

For the Italian IT company, which recently became part of the Norwegian stock listed company Arribatec Solutions ASA, this proves the investments done over the last 5 years in creating state-of-the-art, innovative software for the maritime industry have resulted in valuable and future-proof solutions.
